

ROLES OF WOMEN IN THE GOVERNMENT WORKFORCE

A SEMINAR FOR MEN AND WOMEN IN GOVERNMENT ORGANIZATIONS

By Patricia Griffith

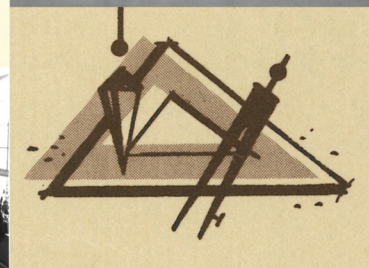

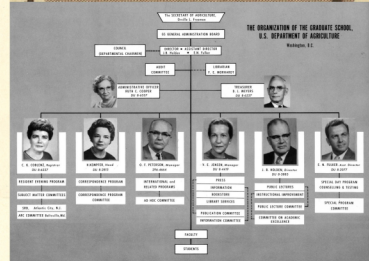

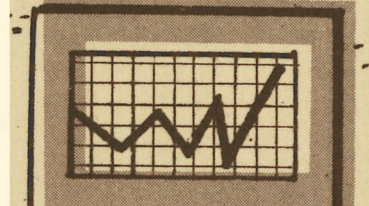

Nothing Corn-y About Agriculture's School

THE GRADUATE School of the Department of Agriculture does not, as its name implies, offer courses in advanced milking or corn-growing techniques. Its curriculum does include almost everything else, however, from automatic data processing to Mandarin Chinese, from medical microbiology to institutional housekeeping.

In fact, almost everything about the school is unique. It was started 40 years ago when Congress urged Federal departments and agencies to do everything possible to promote additional training and education for their employees.

Since the beginning, the Graduate School has been an independent, self-governing...

CHANGING ROLES OF WOMEN IN THE GOVERNMENT WORKFORCE

A SEMINAR FOR MEN AND WOMEN IN GOVERNMENT ORGANIZATIONS

SPECIAL PROGRAMS GRADUATE SCHOOL

Workers in and out of the government sign up for courses offered by the Graduate School of the Department of Agriculture. Most classes begin at 8:30 p.m. on Tuesday, in Room 401 of the main building.

Students in photography are among the school's most popular offerings. Here instructor Elvira Pardo shows light on a subject in a class on portrait photography. Color photography is also taught.

Nothing Corn-y About Agriculture's School

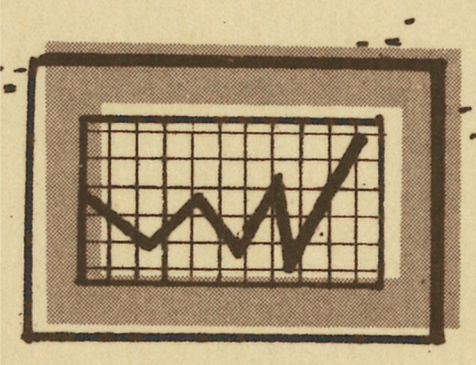

THE GRADUATE School of the Department of Agriculture does not, as its name implies, offer courses to advanced students or even provide instruction.

In fact, almost everything about the school is unique. It was started 40 years ago when Congress urged Federal departments and agencies to do everything possible to promote additional training and education for their employees.

Since the beginning, the Graduate School has been an independent, nonpartisan agency within the Department of Agriculture. The only Government support it receives is in the form of free office and classroom space made available at the Department of Agriculture and over 20 other locations.

Students tuition free; generally \$12 per credit hour and laboratory equipment, including textbooks.

Despite its name, it is not a true graduate school. "We do not issue any degrees," explains director John Hilden. "About 50 to 60 new courses are offered each year."
